

# FLY TIPPING

**Our school community battles with hazardous litter in the area. We aim to keep the area clean and safe. We are trying to combat this by contacting our local MP and producing assemblies making pupils aware of the dire issue. We are also educating our school community on the seriousness of littering and how their actions affect it help us defeat this perilous issue. I and my peers in the Yr11 citizenship team are trying to conquer an issue we would love to see your support throughout our project.**

**Please understand and consider looking after the environment, as by this we are not just protecting the environment but ourselves too.**

**Are you here to help us?**
