Interim Headteacher Mrs J Daw

Dear Parent/Carer,

Following the recent Year 11 **Science Mock Examinations**, I am writing to inform you that a number of results have been concerning. These outcomes indicate that additional, structured support is required to ensure that students are fully prepared for their GCSE Science examinations in May.

In response, we have introduced a programme of planned Science homework that covers the full GCSE Science curriculum. This homework has been carefully designed to consolidate learning, address gaps in understanding, and strengthen exam technique in preparation for the final examinations.

This planned homework will be set and monitored on a weekly basis and will be checked regularly by the class teacher. Completion of this work is essential if students are to make the progress required over the coming months.

We strongly encourage your support in ensuring that your child completes this homework consistently each week and approaches it with focus and commitment.

Science teachers will be keen to discuss your child's progress and the support in place during **Parents' Evening on Thursday 26th February 2026**. We value the opportunity to work in partnership with you to help your child achieve their full potential.

We expect to see a clear improvement in engagement, effort, and outcomes as a result of these measures, and we appreciate your continued support.

Yours sincerely,

Mrs Yusuf

Head of Science

Holy Trinity Catholic School
